

Description

Blend of gall and pyrogallallic tannins from oak and chestnut with antiseptic and antioxidant power. Particularly active in the case of grapes affected by *Botrytis Cinerea*.

Composition

- 84,45% hydrolysable tannins (Gallic acid)
- 11,5% Ellagic acid
- 6% condensed tannins (catechin and epicatechin)
- 0,05% Syringic acid

Gallic acid

Ellagic acid

Catechin

Syringic acid

Epicatechin

Technical specifications

- Specific for red grapes and musts.
- Particularly active in grapes affected by *Botrytis Cinerea*.
- Antioxidant and antiseptic action.

For professional oenological use in compliance with EEC/EU Reg. N°934/2019 and International Codex OIV.

Applications

Specific for red grapes and musts. To be used during pressing as an alternative to sulphur dioxide.

During mechanical harvesting or in press loading as an antiseptic and antioxidant.

Recommended dosage 5 to 20 g/hl.

Preparation mode

Dissolve in warm water at a ratio of 1:10 at the time of use.

Packages

4 and 25 kg bags.

Shelf life and storage

Keep in a cool, dry place away from light.

Shelf life: as stated on the label.

GMOs free in compliance with EEC/EU Reg. n. 1829/2003 and EEC/EU Reg. n. 1830/2003 and subsequent amendments.

Allergens free in compliance with EEC/EU Reg. n. 1169/2011 and subsequent amendments.
