

Description

Antioxidant product replacing sulphur dioxide. To be used to solve oxidative problems and premature ageing of wines.

Composition

Mix of hydrolysable tannins and condensates of plant origin.

Gallic acid

Ellagic acid

Syringic acid

Technical specifications

- Tannic content: > 73%
- Ashes: < 4%
- pH sol. 1%: 2,7 – 3,7
- Humidity: < 8%
- Reducing action, replacement for sulphur dioxide
- Protects primary and secondary aromas from oxidation
- Effective in reducing reduced odours and sulphur notes

For professional oenological use in compliance with EEC/EU Reg. N°934/2019 and International Codex OIV.

Applications

Natural product with a reducing and protective action on primary and secondary aromas.

To be used in white, red and rosé wines in post fermentation and ageing. Also suitable for removing oxidative notes from wines aged in wood and enhance varietal aromas.

Recommended dosage: from 3 to 15 g/hl depending on the type of wine and purpose of use.

Preparation mode

Dissolve in water at 40-50°C keeping stirring, at the time of use.

Packages

1 kg package.

Shelf life and storage

Keep in a cool, dry place away from light.
Shelf life: as stated on the label.

GMOs free in compliance with EEC/EU Reg. n. 1829/2003 and EEC/EU Reg. n. 1830/2003 and subsequent amendments.

Allergens free in compliance with EEC/EU Reg. n. 1169/2011 and subsequent amendments.
